Dear Clinically Responsible Service Provider:

As you know, the State of Michigan and local communities are now in the process of receiving vaccinations for the most vulnerable members of our community. The state has been working in collaboration with large chain pharmacies such as Walgreen's, CVS, and Meijer to provide vaccinations to the residents of assisted living facilities, nursing homes, and group homes.

The process is working. Many members received the first dose of the vaccine and are scheduled to receive the second dose. We want to ensure that members and their guardians understand the importance of informed consent. So, while we realize the process has moved quickly, we ask that the Case Managers and Supports Coordinators follow up with their assigned homes to check that consent was obtained or the consumer/guardian declined.

The Residential Department is working with the specialized residential providers to get information about the number of residents and staff vaccinated. Our data is related to specific tracking tasks, and we are not asking for your Case Managers or Supports Coordinators to do this. Please refer to the Clinically Responsible Service Provider Process Flow for detailed information.

Thank you for your dedication and professionalism during these challenging times.
