

DETROIT WAYNE INTEGRATED HEALTH NETWORK COMPLEX CASE MANAGEMENT

Complex Case Management:

- Supports members with complex medical and behavioral health concerns – like chronic obstructive pulmonary disease, diabetes mellitus, bipolar disorder, schizophrenia, major depressive disorder, asthma, etc.
- Helps members learn how to self-manage their behavioral and physical conditions
- Integrates behavioral and medical health services and ensures that members are linked to needed services
- Works with the current case manager and other clinicians to help members achieve desired goals
- Encourages the team approach and recommends referrals to community resources, peer advocates, and other needed services/supports
- Provided at no cost to members

Teamwork
