BH-TEDs Error Type- Type of Treatment Service Setting

EMU0720 - Invalid Type of Treatment Service Setting - If Client Transaction Type U, Type of Treatment Service Setting must be 72, 73, 74, 75, or 76

This error type stems from a change the state made in the Type of Treatment Service Setting. It can no longer be MH Individual Assessment Only but must now be MH Community- Based Program.

1. Go to the Consumer's BH-TEDs record
2. Start with a review of the original Admission record
3. If the Admission was done via the Biopsychosocial (IBPS) as the Source Document, there will need to be a Change Signed Document of the IBPS to change the Type of Treatment Service Setting

   a. Go to the Signature Page of the IBPS and click on the unlock button to enable you to change the Type of Treatment Service Setting to MH Community-Based Program
   b. Once you save it, other errors may appear in a red box that you will also need to address before you can sign and save
   c. Once the Admission is completed, you will need to follow the same process for all other TEDS records following the Admission. All of them should have MH Community-Based Program

4. If the Admission record was created by a Stand-Alone TEDs, the Change link can be used to go in and change the Type of Treatment Service Setting

5. If the Admission record already states MH Community-Based Program, then review the Update Records and change those that do not indicate MH Community-Based Program

BH-TEDs Error Type- Type of Treatment Service Setting

Examples

1. Example of Admission record created from the IBPS as the Source Document
   a. Following the above Change Signed Document process, the Admission record on the IBPS was changed to the Type of Treatment Service Setting to MH Community-Based Program
   b. The MH Update 4/15/19 needs to be changed to MH Community-Based Program as well in order for the TEDS episode to be accepted in full

Episode: MH-...... (open)
